Appendix II. The Adapted Quality Rating Scale

The QRS is a 23-item scale designed to assess the quality of controlled clinical trials for depression and neurosis. As studies that do not involve randomisation and control groups will not be excluded in this review (i.e., qualitative and cross-sectional studies), 4 items ('blinding of subjects', 'blinding of assessor', 'details of side effects' and 'information on comparability') were not applicable and were excluded⁴¹. An additional item was also added to assess whether the studies included a list of limitation of the study and was rated 0 "No limitations mentioned" 1 "Some major limitations missing" and 2 "Comprehensive list of limitations". These changes resulted in a 20-item scale with each item rated from 0 to 2 and a total range from 0 to 40.

Criteria	Score and rating
1. Objectives and specification main	0 = Objectives unclear
outcomes a priori	1 = Objectives clear but main outcome not
	specified a priori
	2 = Objectives clear with a priori specification
	of main method for assessment of outcome
2. Adequate sample size	0 = Less than 50
	1 = 50 to 100
	2 = Over 100
3. Appropriate duration of trial	0 = No follow-up or less than 3 months
	1= 3 to 6 months
	2 = Over 6 months
4. Power calculation for sample (or	0 = Not reported
appropriate reason for sample size for	1 = Mentioned but no details
qualitative/cross-sectional)	2 = Details of calculation or reason provided
5. Method of allocation	0 = Unrandomised and likely to be biased
	1 = Partially or quasi-randomised with some
	bias possible
	2 = Randomised allocation

6. Concealment of allocation with	0 = Not done or not reported
description of treatments	2 = Concealment of allocation code detailed
7. Clear description of treatments and	0 = Main treatment not clearly described
adjunctive treatment	1 = Inadequate details of main or adjunctive
•	
	treatments
	2 = Full details of main and adjunctive
	treatments
8. Source of subjects described and	0 = Source of subjects not described
representative	1 = Source of subjects described but no
	information on sampling or use of
	unrepresentative sample (e.g., self-selected)
	2 = Source of subjects described and
	representative sample taken (e.g.,
	consecutive admissions, random sample)
9. Use of diagnostic criteria (or clear	0 = None
specification of inclusion criteria)	1= Diagnostic criteria or Clear inclusion criteria
	2 = Diagnostic criteria and specification of
	•
	severity
10. Record of exclusion criteria and number	0 = Criteria and number not reported
of exclusions and refusals reported	
	1 = Criteria or number of exclusions and
	1 = Criteria or number of exclusions and refusals not reported
	refusals not reported 2 = Criteria and number of exclusions and refusals reported
11. Description of sample demographics	refusals not reported 2 = Criteria and number of exclusions and
11. Description of sample demographics	refusals not reported 2 = Criteria and number of exclusions and refusals reported
11. Description of sample demographics	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex)
11. Description of sample demographics	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity) 2 = Full description (e.g., clinical history,
11. Description of sample demographics 12. Assessment of compliance with	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity)
12. Assessment of compliance with	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity) 2 = Full description (e.g., clinical history, socioeconomic status) 0 = Not assessed
	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity) 2 = Full description (e.g., clinical history, socioeconomic status)
12. Assessment of compliance with experimental treatments (including	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity) 2 = Full description (e.g., clinical history, socioeconomic status) 0 = Not assessed
12. Assessment of compliance with	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity) 2 = Full description (e.g., clinical history, socioeconomic status) 0 = Not assessed 1 = Assessed for some experimental treatments
12. Assessment of compliance with experimental treatments (including attendance for therapy)	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity) 2 = Full description (e.g., clinical history, socioeconomic status) 0 = Not assessed 1 = Assessed for some experimental treatments 2 = Assessed for all treatments
12. Assessment of compliance with experimental treatments (including attendance for therapy) 13. Record of number and reasons of	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity) 2 = Full description (e.g., clinical history, socioeconomic status) 0 = Not assessed 1 = Assessed for some experimental treatments 2 = Assessed for all treatments 0 = No information on withdrawals by group 1 = Withdrawals by group reported without
12. Assessment of compliance with experimental treatments (including attendance for therapy) 13. Record of number and reasons of	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity) 2 = Full description (e.g., clinical history, socioeconomic status) 0 = Not assessed 1 = Assessed for some experimental treatments 2 = Assessed for all treatments 0 = No information on withdrawals by group
12. Assessment of compliance with experimental treatments (including attendance for therapy) 13. Record of number and reasons of	refusals not reported 2 = Criteria and number of exclusions and refusals reported 0 = Little/ no information (only age/sex) 1 = Basic details (e.g., martial status/ethnicity) 2 = Full description (e.g., clinical history, socioeconomic status) 0 = Not assessed 1 = Assessed for some experimental treatments 2 = Assessed for all treatments 0 = No information on withdrawals by group 1 = Withdrawals by group reported without

therefore replicable) or use of validated (or	1 = Some main outcomes not clearly described
dicteriore replicable) of ase of validated (of	1 Some main outcomes not eleury described
referenced) instruments	2 = Main outcomes clearly described or valid
	and reliable instruments used
15. 'Intention to treat' analysis (all subjects	0 = Less than 95% of subjects included
13. Intention to treat analysis (an subjects	0 – Less than 55/6 of subjects included
included)	2 = 95% or more included
16. Presentation of results with inclusion of	0 = Little data presented
data for re-analysis of main outcomes (for	1 = Adequate summary statistics or data
example, SDs)	presented
-	•
	2 = Comprehensive
17. Appropriate statistical analysis (including	0 = Inadequate
correction for multiple tests where	1 = Adequate
applicable)	2 = Comprehensive and appropriate
18. Conclusions justified	0 = No
	1 = Partially
	2 = Yes
19. Declarations of interests (for example,	$0 = N_0$
acknowledgements, funding)	2 = Yes
20. Limitations listed	0 = No limitations listed
	1 = Some major limitations missing
	2 = Comprehensive list of limitations
